

CV for ECTRIMS

Mahreen Pakzad is a Consultant Urological Surgeon, trained at St. Bartholomew's Hospital Medical School in London. Her MD thesis was at UCL and is entitled "The role of adenosine in overactive bladder syndrome". She works in the department of Female, Functional and Restorative urology unit at UCLH providing anti-incontinence treatment and surgery, such as sacral neuromodulation and bladder wall BOTOX injections. Her role at The National Hospital of Neurology and Neurosurgery is as a Consultant Urological Surgeon with a specialist interest in Uroneurology assessment and treatment of patients with bladder dysfunction as a result of neurological disease such as Multiple sclerosis and Parkinson's disease.

Research Interests include:

- 1. Non-antibiotic approaches to the treatment of recurrent UTI.**
- 2. The role of sacral neuromodulation in the treatment of men and women with bladder problems.**
- 3. An MRI study evaluating the CNS correlates in overactive bladder dysfunction.**
