

John DeLuca, PhD, is the Senior Vice President for Research and Training at Kessler Foundation, a Professor in the Department of Physical Medicine & Rehabilitation, and the Department of Neurology at Rutgers, New Jersey Medical School. He is board certified in Rehabilitation Psychology by the American Board of Professional Psychology. Dr. DeLuca has been involved in neuropsychology and rehabilitation research for over 25 years. He is internationally known for his research on disorders of memory and information processing in a variety of clinical populations including: multiple sclerosis, traumatic brain injury, aneurysmal subarachnoid hemorrhage, and Chronic Fatigue Syndrome. Dr. DeLuca has published over 300 articles and book chapters in these areas, has edited 5 books in neuropsychology, neuroimaging and rehabilitation, and is a co-editor for the "Encyclopedia of Clinical Neuropsychology." He has received over 32 million dollars in grant support for his research. Dr. DeLuca's most recent research ventures include the cerebral mapping of human cognitive processes using functional neuroimaging, as well as the development of research-based techniques to improve cognitive impairment. He serves on the editorial boards of many journals and has received several awards in recognition of his work. Dr. DeLuca has been very involved for many years in the training of post doctoral fellows in neuropsychology and rehabilitation, and has directed several advanced research and training programs sponsored by NIDRR, the National MS Society, and NIH since 1990.
