

**Sandra Vukusic** is professor of Neurology and head of the Multiple Sclerosis clinic (Neurology dept. A) at the Lyon University Hospital, France. She is President of the EDMUS Foundation, scientific coordinator of the Observatoire Français de la Sclérose en Plaques (French MS registry) and member of the Lyon Neuroscience research center (CRNL, UMR CNRS 5292 & Inserm U1028).

Besides her neurological training in Lyon, France, she also has a PhD in neuro-epidemiology. Together with her mentor Christian Confavreux, she has been working since 1998 on the description of the natural history of multiple sclerosis through the Lyon multiple sclerosis (MS) Cohort, introducing new pathophysiological concepts. She continues to develop epidemiological projects on long-term effect of immunoactive drugs on disability progression, pregnancy issues and pharmacoepidemiology of disease-modifying drugs.
