

**Suhayl Dhib-Jalbut, MD** is Professor and Chairman of the Departments of Neurology at RUTGERS-Robert Wood Johnson Medical School and New Jersey Medical School. He also directs the RWJ Center for Multiple Sclerosis (MS). Dr. Dhib-Jalbut graduated Alpha-Omega-Alpha from the American University of Beirut in Lebanon and completed his Neurology training at the University of Cincinnati. He then joined the Neuroimmunology Branch at the National Institutes of Health (NIH) in Bethesda, Maryland where he specialized in MS and Neuroimmunology. He is currently the past president of the Americas Committee for Treatment and Research in Multiple Sclerosis (ACTRIMS).

Dr. Dhib-Jalbut's extramurally funded research includes how MS therapies work, biomarkers of treatment response in MS, and more recently how the gut microbiome contributes to the risk of MS. To date, he has contributed over 130 manuscripts to the scientific literature. He has served as Associate Editor of the Journal of Neuroimmunology, Associate Editor of the MS Journal and is currently a member of the Editorial Boards of JICR, Cytokine, Multiple Sclerosis and Demyelinating Diseases, and the MS Journal. He has served on several National and International scientific committees including Chairmanship of the Scientific Committee for the World Congress on MS in Montreal in 2008. Dr. Dhib-Jalbut served as President of ACTRIMS and presided over the joint ACTRIMS/ECTRIMS Congress held in Boston in 2014. Dr. Dhib-Jalbut has been on the Best Doctors in America list since 2009 and has received several awards and recognitions including the Norman H. Edelman clinical science mentoring award at Rutgers, the Medical Excellence Award from the National MS Society, the Outstanding Medical Scientist Award from the Edward J. III Excellence in Medicine Foundation, and the Excellence in Research Award from the New Jersey Health Foundation.
