

Biosketch Cinthia Farina

Dr. Cinthia Farina, a PhD and neuroimmunologist, is Head of the Immunobiology of Neurological Disorders Unit at the Institute of Experimental Neurology at San Raffaele Hospital in Milan. Her research activity has provided original advancement on the immunological monitoring of MS treatment, the stratification of clinical MS stages via blood transcriptomics, the comprehension of glia-neuron interactions in MS lesions and the identification of novel therapeutic targets. She has received several awards, including the Young Investigator Award for Multiple Sclerosis Research by the European Charcot Foundation. Dr. Farina is an elected member of the scientific advisory boards of the Italian Association of Neuroimmunology and the International Society of Neuroimmunology. She is a selected member of the Grant Review panel 1 of the UK Multiple Sclerosis Society and serves as reviewer for several granting agencies including Agence Nationale de la recherche, National Institute for Social Care and Health Research (NISCHR)/Welsh Assembly Government, DFG Deutsche Forschungsgesellschaft, Foundation ARSEP, SAO-FRMA Stichting voor Alzheimer Onderzoek- Fondation pour la Recherche sur la Maladie d'Alzheimer, AFM-Téléthon.
