

Manuel Friese studied medicine at the Universities of Hamburg, Oxford and University College London and received his MD in 2001. He completed his neurology training at the Universities of Tübingen and Hamburg. After his postdoctoral training at the University of Oxford from 2004–2008, he started his laboratory as an Emmy Noether research fellow of the German Research Foundation (DFG) at the University of Hamburg. Since 2013 he has been consultant neurologist and Professor of Neuroimmunology at the University of Hamburg and since 2014 director of the Institute of Neuroimmunology and Multiple Sclerosis (INIMS). His laboratory focuses on inflammatory and neurodegenerative aspects of neuroimmunological and neuroinfectious diseases.
