

Dr. Riley Bove studied anthropology with a focus on women's health at Harvard College (Phi Beta Kappa), and through a Fulbright grant in Mali. She obtained her MD from Harvard Medical School in 2007, completed her residency in the combined Massachusetts General Hospital – Brigham and Women's Hospital Neurology program, a clinical research fellowship at the Partners MS Center, and a Master's Degree through Harvard Medical School's Clinical Investigator Training Program. She has received research support from the NIH, the National MS Society and the Hilton Foundation, among others. Dr. Bove is board-certified in Neurology and joined the University of California, San Francisco (UCSF) Faculty in 2015. She sees patients in the UCSF Center for MS and Neuroinflammation where she runs a Gender-based care program and a pregnancy registry. Her research laboratory (bovelab.ucsf.edu) focuses on tools to promote healing and repair in people with MS, including digital tools and hormonal strategies. Her publication record can be found at <https://profiles.ucsf.edu/riley.bove>.
