

Biography – Anders Skjerbæk

ECTRIMS

Anders Skjerbæk is specialized within MS rehabilitation and currently holds a position as development Manager at the Danish MS Hospitals. His main responsibilities are project management, strategic planning, scientific work and quality improvement activities.

Anders Skjerbæk qualified as a Physiotherapist in 2005 and holds a Master degree in Rehabilitation from 2012. In his early career he was working as private practitioner but since 2008 he has been employed at the MS hospitals in Denmark with different responsibilities within rehabilitation of MS patients, counselling of PT-students, research and management activities.

Some of his latest research activities involve publication of data from "The Danish MS Hospital Rehabilitation Study" and previously he has been co-author of the Danish national guidelines on "physiotherapy and occupational therapy in persons with MS", which was published in 2015.

Anders Skjerbæk serves as management representative (without voting rights) in the executive board at the Danish MS Hospitals and he also holds a position as executive board member in the organization of RIMS (the European network for best practice and research in MS Rehabilitation).

In addition Anders Skjerbæk serves as member of "the Social & Behavioral Science Research Scientific Committee" in the Italian Multiple Sclerosis Foundation and finally he's a member of the "health committee" in the Danish MS Society.
