Päivi Hämäläinen has worked as a neuropsychologist in Masku neurological rehabilitation centre, owned by the Finnish Neuro Society (former MS Society), since 1990. Since 1999, she has worked as the head of the Psychology department and since the beginning of March, 2011 as the head of the rehabilitation centre. Since 2005 she has acted as an adjunct professor in the Psychology Department in the University of Turku. She is actively involved both in national and international neuropsychological activities. She is a former member of the executive board of the Rehabilitation in Multiple Sclerosis (RIMS) and the International MS and Cognition Society (IMSCogS). Her main research interests are cognitive deficits in MS, especially cognitive fatigue and holistic and strategy-oriented neuropsychological rehabilitation in MS. She acts as a supervisor for several Finnish neuropsychologists keen on cognition and MS.
