

Andrew J. Solomon, MD, is an Associate Professor and Division Chief of multiple sclerosis (MS) at the University of Vermont (UVM) Department of Neurological Sciences in Burlington, VT. Dr. Solomon earned his medical degree from Mount Sinai School of Medicine in New York, NY where he participated in the Humanities and Medicine Program and also graduated with Distinction in Research. He completed his internship in internal medicine, his residency in neurology, and his fellowship in multiple sclerosis and neuroimmunology at Oregon Health & Science University and the Portland VA Medical Center in Portland, OR.

At the UVM MS Center, Dr. Solomon is an investigator on numerous local and national multicenter clinical and translational studies evaluating therapeutic and prognostic interventions for MS. Dr. Solomon has been recognized nationally and internationally for his research on MS diagnosis and misdiagnosis. His current work focuses on the evaluation of novel diagnostic imaging and laboratory biomarkers for MS.
